Online Master tracks for Government Officers

No. N-21/49/2025-NeGD

Date 21/4/25

As part of NeGD's ongoing efforts to enable **capacity building and digital transformation** for government officers under the **Digital India Programme**, NeGD has been collaborating with premier institutes like yours to deliver impactful training programs. These initiatives have greatly contributed to empowering officers with the knowledge and skills necessary to navigate the challenges of governance in the digital era.

To further expand the scope of these efforts, NeGD is curating a **list of online courses** specifically designed for **Group A officers of the government.** These courses aim to address key areas such as **Digital Transformation, Digital Infrastructure & Cybersecurity, Data Analytics, and Leadership in Emerging Technologies** while offering flexibility to officers through online or hybrid delivery modes. These courses will be partly sponsored by NeGD.

In this regard, it is requested that your esteemed institution to share **relevant online courses , already running successfully with high quality content** aligned with the following parameters:
- Institute to be NIRF listed
- Initial focus areas as mentioned in the para 2 above
- Delivered in **online or hybrid mode**, allowing officers to participate while on duty.
- Duration of **3 months or more**, with rigorous assessments or capstone projects.

Few of them are identified, as mentioned in the **Annexure-I.** We would request you that this list may be used a guide, it is only indicative.

Please provide the required information in the enclosed format at

by 04.05.2025. The courses shared by your institution will be evaluated for inclusion in the curated list to be recommended to government officers across states and union territories.

It would be grateful if you could also explore the possibility of providing the programme details in **discounted fee structure** for government officers enrolling in your courses along with special **group rates** for nominations from multiple officers in a single batch.
