Job Description:

Full Stack Developer, contributing to cutting-edge web applications, primarily using MEAN and MERN stacks. This role emphasizes frontend development with a hint of backend technologies.

Education Qualifications & Experience:

Bachelor's degree in computer science, Engineering, or a related field with a minimum of 3 years of experience in relevant field.

Roles and Responsibilities

- Collaborate with cross-functional teams for intuitive and responsive web application design.
- Develop and integrate user-centric features using either MEAN or MERN stack.
- Utilize SQL for comprehensive data management, writing complex queries for retrieval and manipulation.
- Ensure seamless frontend-backend interaction for a cohesive user experience.
- Participate in code reviews, ensuring frontend excellence and backend synergy.
- Troubleshoot frontend issues and collaborate on backend optimizations.

Required Skill Set

- Proficiency in JavaScript and its frontend ecosystem.
- Experience with at least one MEAN and/or one MERN stack project, emphasizing frontend development.
- Understanding of RESTful APIs and their seamless integration with frontend systems.
- Basic knowledge of version control systems, preferably Git.
- Ability to work collaboratively in a team environment.

Desirable Skill Set

- Strong understanding of JavaScript and its frontend frameworks/libraries (React.js, Angular).
- Familiarity with databases, particularly MySQL.
- Basic knowledge of CSS preprocessors, such as Sass or Less.
- Solid problem-solving and communication skills.
- Eagerness to learn and adapt in a fast-paced environment.

Job Description:

Business Analyst responsible for analyzing business processes, gathering requirements, and providing strategic solutions to enhance operational efficiency.

Education Qualifications & Experience:

- Bachelor's degree in business administration, IT, or a related field.
- Additionally, the role involves designing scalable software solutions that align with business needs and technological advancements.
- Minimum 3 years of experience in relevant field.

Roles and Responsibilities

- Collaborate with stakeholders to identify business needs and define functional requirements.
- Document detailed specifications for new projects, ensuring clear communication between business and technical teams.
- Identify opportunities for process improvements and recommend data-driven solutions.
- Assist project teams in testing and validation phases to ensure quality outcomes.
- Create and maintain thorough documentation, including user stories and workflow diagrams.
- Design architectural solutions that align with business goals and technology trends.
- Develop and maintain solution roadmaps to ensure scalability and long-term viability.
- Work closely with development teams to implement architectural best practices.

Required Skill Set

- Proficiency in business requirement gathering and process documentation.
- Ability to analyze data and generate insightful reports.
- Hands-on experience in identifying and implementing process improvements.
- Knowledge of Agile methodologies and best practices.
- Strong understanding of software design principles and system integrations.
- Ability to work collaboratively across teams to drive business success.

Desirable Skill Set

- Strong analytical and problem-solving skills.
- Excellent communication skills for stakeholder engagement.
- Experience with business analysis tools (JIRA, Microsoft BI, Visio).
- Understanding of the Software Development Lifecycle (SDLC) and Agile methodologies.
- Expertise in designing software architectures and scalable solutions.
- Knowledge of cloud computing, microservices, and API-driven architecture.
