

Workshop-cum-Interactive Session on DigiLocker held in Bihar

The National e-Governance Division (NeGD) in collaboration with the Department of Information Technology, Government of Bihar and the State e-Mission Team (SeMT), organised a Workshop-cum-Interactive Session on DigiLocker on April 24, 2025 in Patna.

The session was convened to promote the strategic adoption of DigiLocker and Entity Locker — two transformative digital platforms designed to enable secure, paperless, and citizen-centric service delivery across government departments.

Present at the workshop were Shri Arvind Kumar Choudhary, Special Secretary, Department of IT, Government of Bihar; Shri J.L. Gupta, Director, NeGD; Mr. Gauravdeep Singh, Head-SeMT, Bihar; Mr. Prabhnoor Singh, Deputy Manager, NeGD; and Mr. Shiven Shankar, Senior Manager, NeGD along with senior representatives from various state departments and agencies.

The workshop highlighted how DigiLocker empowers citizens to securely access, store, and share their important documents anytime, anywhere. Simultaneously, Entity Locker extends these capabilities to government departments, enabling them to issue and verify documents digitally, thereby enhancing efficiency and authenticity in service delivery.

The interactive session focused on onboarding strategies, integration roadmaps, and best practices for departments to leverage these platforms effectively. Discussions underscored the importance of aligning departmental services with national digital infrastructure to foster a secure, transparent, and inclusive digital governance ecosystem.
