

NeGD, MeitY Showcases Flagship Digital India Initiatives at Global Fintech Fest 2025, Mumbai

The National e-Governance Division (NeGD), Ministry of Electronics & Information Technology (MeitY), actively participated in the Global Fintech Fest 2025 held at Jio World Convention Center, Mumbai, from October 7 - 9, 2025.

At the NeGD pavilion, flagship Digital India initiatives- DigiLocker, EntityLocker, and API Setu- were showcased, highlighting groundbreaking efforts towards secure, paperless, and innovative digital governance. The pavilion drew significant interest from leading fintech organizations, startups, and innovators, exploring opportunities for deeper integration and collaboration to bolster trust, transparency, and interoperability within India's growing digital ecosystem.

On October 8, 2025, NeGD and National E-Governance Services Limited (NeSL) signed a strategic Memorandum of Understanding (MoU). This partnership aims to integrate EntityLocker with NeSL's Digital Document Execution (DDE) platform, facilitating seamless and secure access to digitally executed documents, including electronic bank guarantees (e-BGs).

Notably, Shri Sunil Jain, Director, NeGD, participated in a panel discussion titled "Leveraging the Digital Public Infrastructure for Accreditation of Investors." He emphasised the transformative potential of NeGD and MeitY's Digital Public Infrastructures such as DigiLocker, EntityLocker, and API Setu, which are enabling seamless and paperless delivery of investor accreditation and essential services.

A master class on the Digital Personal Data Protection Act (DPDPA) convened around 100 fintech professionals to deepen their understanding of the Act's impact on financial institutions and digital businesses. This was complemented by a master class on DigiLocker & EntityLocker held on October 9, 2025, which engaged fintech operators, partner banks, and lenders in discussions on the requestor model, consent-based access, and next-generation digital document sharing.

NeGD's broad engagement at GFF 2025 underscores its unwavering commitment to building a digitally empowered, transparent, and future-ready India- advancing the nation's vision of safe, inclusive, and innovative governance.
