NeGD Announces Successful Integration of DigiLocker with TCS iON Recruitment Workflow

New Delhi, 30/9/2025: The National e-Governance Division (NeGD), Ministry of Electronics and Information Technology (MeitY), announces the successful integration of DigiLocker with the recruitment workflow of TCS iON, a strategic unit of Tata Consultancy Services. This achievement further strengthens the Government of India's vision of **Digital India**, enabling delivery of efficient, transparent, and citizen-centric digital services.

DigiLocker, one of the flagship initiatives under the Digital India programme, provides citizens with a secure platform to access, store, and share authentic digital documents issued by various government departments, educational boards, and other institutions. With this integration, recruitment processes managed by TCS iON will now leverage DigiLocker for digital verification of candidate documents, minimizing paperwork and enhancing convenience for millions of applicants across the country.

The integration delivers significant benefits:

- **Authentic and legally valid digital documents** directly accessible by recruitment authorities.
- **Enhanced efficiency** through reduced time and effort in manual verification.
- **Improved accuracy** by avoiding errors linked to physical submission and manual data entry.
- **Transparent and citizen-friendly process** where candidates provide consent digitally to share their documents.

Initially, the DigiLocker integration will be rolled out to two partner organisations, followed by a wider adoption across additional recruitment bodies in a phased manner.

TCS iON has been a leading technology partner in revolutionizing examinations in India. Since 2012, it has pioneered the shift from offline Pen & Paper examinations to Computer-Based Tests (CBT), and today powers recruitment and examination processes for leading national bodies including **SSC, NTA, IBPS, EdCIL**, and several state and central government departments.

To date, more than **50 crore candidates have been assessed for over 600 organisations** through TCS iON platforms.

About DigiLocker

DigiLocker is a flagship initiative under the Digital India program by the Ministry of Electronics and Information Technology (MeitY). It provides citizens with a personal digital document wallet to store, access, and share authentic records, contributing towards paperless governance and nationwide digital transformation.
